

VodaPulse Telecom EDA Project Description

This project focuses on conducting exploratory data analysis (EDA) on VodaPulse customer data to understand:

- customer demographics,
- usage patterns,
- service experience, and
- revenue characteristics.

The analysis examines variables such as

- age, province,
- area type,
- contract type,
- device type,
- payment method,
- network experience,
- support tickets,
- load-shedding impact,
- app engagement,
- data usage, and
- ARPU.

The goal is to identify meaningful patterns and relationships in the data and provide practical insights that can support better customer understanding and business decision-making.
